

## Siemens Logistics, Qatar Airways Cargo and Qatar Aviation Services (QAS) Cargo agree on cooperation to digitalize cargo processes

- **Joint development of innovative freight handling solutions**
- **Improvement of operational efficiency using state-of-the-art data analytics and predictive maintenance**

Siemens Logistics, Qatar Airways Cargo and Qatar Aviation Services (QAS) Cargo have signed a Memorandum of Understanding (MoU) to promote close cooperation in digitalizing cargo handling processes. The collaborative project will, among others, deploy the latest in data analytics applications and predictive maintenance. It is also set to positively impact sustainability as well as health and safety. With this MoU, three major players come together: Siemens for airport digitalization and automation, QAS Cargo for world-class cargo handling at the Doha hub, and Qatar Airways Cargo as the leading air cargo carrier in the world.

“Artificial intelligence, machine learning and senseful data usage are becoming increasingly important within airfreight handling,” said Michael Reichle, CEO of Siemens Logistics. “We are excited to work with Qatar Airways Cargo and QAS Cargo in a forward-looking collaboration to jointly achieve results that will strengthen operational efficiency in demanding cargo processes.”

“Our aim at Qatar Airways Group is to further implement digitally advanced, innovative cargo solutions to ensure that all stakeholders benefit from an even more sustainable and seamless operating environment. For this, Siemens Logistics is our clear choice as an experienced technology partner. With the signing of the MoU for digitalization, we are preparing for the challenges to come,” explained Guillaume Halleux, Chief Officer Cargo at Qatar Airways Group.

Among others, the planned activities will involve joint workshops, mutual site visits, and technical assistance trainings. Pilot studies, together with research and development, will also be part of this MoU.

**Siemens Logistics GmbH** is a fully owned subsidiary of Siemens AG. Siemens Logistics is a leading provider of innovative and high-performance solutions for airport logistics. The portfolio includes products and solutions for baggage and cargo handling, high-end software for the digitalization of logistics processes as well as an extensive range of maintenance and services. Siemens Logistics is represented worldwide through its regional companies and active in more than 60 countries. Major customers include renowned airports and airlines around the globe. Further information is available online at [www.siemens-logistics.com](http://www.siemens-logistics.com).

**Siemens AG** (Berlin and Munich) is a global technology powerhouse that has stood for engineering excellence, innovation, quality, reliability and internationality for more than 170 years. Active around the world, the company focuses on intelligent infrastructure for buildings and distributed energy systems and on automation and digitalization in the process and manufacturing industries. Siemens brings together the digital and physical worlds to benefit customers and society. Through Mobility, a leading supplier of intelligent mobility solutions for rail and road transport, Siemens is helping to shape the world market for passenger and freight services. Via its majority stake in the publicly listed company Siemens Healthineers, Siemens is also a world-leading supplier of medical technology and digital health services. In addition, Siemens holds a minority stake in Siemens Energy, a global leader in the transmission and generation of electrical power that has been listed on the stock exchange since September 28, 2020. In fiscal 2021, which ended on September 30, 2021, the Siemens Group generated revenue of €62.3 billion and net income of €6.7 billion. As of September 30, 2021, the company had around 303,000 employees worldwide. Further information is available on the Internet at [www.siemens.com](http://www.siemens.com).
