

Siemens Logistics to focus on airport logistics going forward

- **Sale of parcel and mail business to international technology group Körber completed**
- **Airport business remains at Siemens**
- **Emphasis on automation and digitalization to boost airport efficiency**

Having successfully sold its parcel and mail business to the Körber group, Siemens Logistics continues to focus on flexible products and solutions for airport baggage and freight handling, with a particular emphasis on automation and digitalization.

“We’re delighted that our parcel business – and above all our former Siemens Parcel Logistics employees – have found a sustainable new home at Körber. The complementary technologies of Körber and Siemens Parcel Logistics, together with the regional structures, are a perfect fit and lay a solid entrepreneurial foundation for the future,” said Michael Reichle, CEO of Siemens Logistics, and former CEO of Siemens Parcel Logistics.

The airport logistics solutions business remains at Siemens AG and will continue to operate as an independent subsidiary within the corporate group.

“We’re seeing a distinct uptick in demand for air travel. After the last two years, airport operators are now on the lookout for solutions that will boost their overall efficiency while still being fast and flexible to implement. We’re in an ideal position here with our portfolio of high-performance hardware and intelligent, cloud-based software combined with our international presence,” explains Michael Reichle. “It enables us to offer targeted support to our customers as their businesses continue to recover strongly.”

Siemens Logistics is one of the world's leading airport logistics providers, for baggage and freight handling as well as integrated airport digitalization solutions. Its portfolio

features world firsts such as the VarioBelt TilterPlus belt conveyor, the automated ULD unloader VarioTip, and the versatile Baggage 360 airport operations software. This application is still the only one of its kind that makes it possible to predict baggage flow in real time, empowering airport operators to plan and deploy their available resources to maximum effect. Airports all over the world, from international hubs to regional passenger airports, number among the customers of Siemens Logistics.

Siemens AG (Berlin and Munich) is a global technology powerhouse that has stood for engineering excellence, innovation, quality, reliability and internationality for more than 170 years. Active around the world, the company focuses on intelligent infrastructure for buildings and distributed energy systems and on automation and digitalization in the process and manufacturing industries. Siemens brings together the digital and physical worlds to benefit customers and society. Through Mobility, a leading supplier of intelligent mobility solutions for rail and road transport, Siemens is helping to shape the world market for passenger and freight services. Via its majority stake in the publicly listed company Siemens Healthineers, Siemens is also a world-leading supplier of medical technology and digital health services. In addition, Siemens holds a minority stake in Siemens Energy, a global leader in the transmission and generation of electrical power that has been listed on the stock exchange since September 28, 2020. In fiscal 2021, which ended on September 30, 2021, the Siemens Group generated revenue of €62.3 billion and net income of €6.7 billion. As of September 30, 2021, the company had around 303,000 employees worldwide. Further information is available on the Internet at www.siemens.com.
